3. Final Report of the Special Finance Committee dated 31st July 1922 suggesting proposals for balancing the Budget and furnishing a forecast of Revenue and Expenditure with ~~the~~ general observations and recommendations on important points brought to light during their investigation.

(15

Order No.

Dated 1922.

The Special Finance Committee was -- appointed under G.O. No. 4899-958/C.B. 171-21-1 dated 3rd February 1922. As the course of expenditure during the last year indicated that it would end with a heavy deficit instead of a small surplus anticipated when the budget was prepared and it appeared that the position was not likely to improve during the next and succeeding years, the Committee were requested by Government to undertake a detailed and -- continuous investigation into the finances of the State and submit recommendations on the following points:-

(i) Review of the State's Finances for the past five years with a view to ascertain the causes of the deficit in the revenue position.

(ii) Formulation of proposals for wiping out the deficit and restoring financial equilibrium

(a) by retrenchment and economy of expenditure without impairing the efficiency of the essential services, and

(b) by improvement of revenue and resources including enhanced additional taxation if found unavoidable.

(iii) Preparation of a forecast of revenue and expenditure for the next three years so as to result in a balanced budget after providing for necessary financial reserves such as -- Famine Reserve, and Sinking Fund for Loans, as well as for renewals and replacements of the State Railways.

(iv)

(iv) Preparation of a forecast of Capital Demands under all heads for the next three -- years with reference to the resources (including loans) that may be counted upon.

(v) Examination of the past policy in regard to Public Debt and Investments and Ways and Means operations including utilization of Reserve and Depreciation Funds, and suggesting changes, if considered necessary.

2. At the special request of Government, the Committee submitted on the 31st May 1922 an Interim Report of their recommendations which was placed before the Birthday Session of the Representative Assembly as well as the Legislative Council which met soon after. The Final Report of the Committee was received by Government on the 1st August 1922 and Government now proceed to review the same.

3. In their review of the State's Finances during the past five years in accordance with the first term of reference in the order dated 3rd February 1922, the Committee trace the -- course of revenue and expenditure for the quinquennium ending with the year 1920-21. They report that the revenues during the period -- ranged between Rs. 294.24 lakhs and Rs. 315.25 lakhs while the expenditure rose continuously from Rs. 243.37 lakhs to Rs. 336.33 lakhs, so that, during the last year of the quinquennium the expenditure was in excess of the revenue by Rs. 23.20 lakhs. This, however, did not include the contributions to essential -- reserves which amounted to Rs. 20.40 lakhs. The real shortage according to the Committee

6.

Committee in the last year of the quinquennium was therefore Rs. 43.60. They consider that the position during the year 1921-22 was rendered worse by the fact that although the departmental expenditure was reduced by over Rs. 29 lakhs, the large loan of Rs. 2¼ crores raised during the year threw the burden of heavy Interest and Sinking Fund Charges on the normal revenues of the State.

4. The Committee have summarised the causes which have rendered the State's financial position unsound, as follows:-

(i) Sufficient attention was not paid to the development of certain permanent sources of revenue, such as Land Revenue and Stamps. The revision settlement has not received adequate attention.

(ii) Want of due appreciation as between stable and unstable sources of revenue, in the matter of utilising them for permanent or recurring expenditure.

(iii) Utilising the entire receipts from Mining Royalty as a normal item of revenue for ordinary administration.

(iv) Raising the standard of service expenditure out of all proportion to the average level of ordinary revenue.

(v) The starting of new services and -- expansion of activities of old service departments, simultaneously on a large scale.

(vi) Undertaking construction of numerous large buildings and other works without reference to the money available for completing them.

(vii) Simultaneous undertaking of a number

number of large capital works without reference to the resources available for financing them.

(viii) Raising of large loans for expenditure on projects which have proved wholly unproductive or which yield only a small fraction of the expected return and the consequent loss of interest income and the creation of an unproductive debt, the service of which is a -- burden on ordinary revenues.

(ix) Increase in the cost of establishment and of supplies and services on account of rise in prices and wages.

5. In formulating their proposals for wiping out the deficit, the Committee assume that the annual revenues of the State - according to present resources amount to Rs. 299 lakhs while the demands under Service Expenditure inclusive of Sinking Funds and necessary reserves amount to Rs. 341 lakhs resulting in a deficit of 42 lakhs. They have reviewed the expenditure under all the departments of Government in great detail and have submitted 41 resolutions recommending retrenchments in recurring expenditure to the extent of Rs. 35.70 lakhs. They also propose an improvement in ~~the~~ revenue resources, particularly under Forest Revenue, to the extent of Rs. 3.64 lakhs and suggest an enhancement of the Stamp Duty, the Court Fees and the Registration Fees to the extent of about Rs. 5 lakhs in order to bridge the ~~deficit in full.~~ gap between Revenue and Expenditure

8

6. Government have already passed orders on the recommendations submitted by the Committee in their several resolutions. It

It is not ~~now~~ now necessary to refer to them in detail. It will be sufficient if the general effect of the retrenchments already ordered is indicated in brief.

7. The standard of expenditure for --- Service Departments assumed by the Committee in framing their proposals is Rs. 285.5 lakhs which the Committee propose to reduce by retrenchments to a level of about Rs. 250.5 lakhs per annum. Government observe that the standard adopted by the Committee, based as it mainly has been on the budget estimates for -- 1921-22, corresponds neither with the actual expenditure of the year 1920-21, the last year of the quinquennium dealt with in their review, nor with the Revised estimates of the -- succeeding year (1921-22).

8. The orders passed by Government on the different recommendations of the Committee in the matter of retrenchment would, in the ordinary course, have brought down the level of Service expenditure by Rs. 15 lakhs below the standard of 285½ lakhs assumed by the Committee i.e. to 270½ Lakhs. But as the standard of expenditure adopted by the Committee as a basis of their recommendations was much lower than the actual level of service charges, a comparison of the actual service expenditure in 1920-21, the last year of the quinquennium surveyed in the Committee's report, with the allotments made in the budget of the current year is necessary to indicate the full extent of the net retrenchments already effected. The total allotment for service expenditure fixed in the budget for the current year inclusive of the charges on account of Mining Revenue

9

is Rs. 278.24 lakhs and as compared with the expenditure of Rs. 322.36 lakhs actually incurred in 1920-21, it represents a general reduction in Service Charges to the extent of Rs. 44.12 lakhs. It may also be pointed out that the retrenchment of Rs. 44.12 lakhs already effected includes a total sum of Rs. 10½ lakhs out of the reductions ordered as a result of the recommendations of the Committee. Further reductions to the extent of 4½ lakhs have been ordered on their proposals since the budget was fixed and will be given effect to in the course of the year bringing the level of service expenditure to Rs. 273¾ lakhs. The total retrenchments already effected during the ~~last~~ two years amount to Rs. 48.60 lakhs representing a reduction of 15% of total Service Charges and 19% of the part of such charges open to reduction.

9. The minimum level, in the opinion of Government, to which the service expenditure of the State can be reduced with safety has already been indicated in the Dewan's Birthday Address presented to the Representative Assembly. Inclusive of the charges on account of Mining -- Revenue, the minimum level of service expenditure has been fixed at Rs. 270 lakhs. Proposals for effecting a further saving of about Rs 3¾ lakhs are under the consideration of --- Government.

10. It may be pointed out that the reductions in service expenditure already effected and ordered involve the abolition of approximately the following number of posts in Govern-

Government Service:-	
Gazetted posts.	74.
Posts of Executive Subordinates.	396
Ministerial ranks.	178
Menials.	977
	1625

11. With reference to the recommendations of the Committee for the improvement of the resources of the State, an additional grant of Rs. 50,000 has been placed in the budget of the current year at the disposal of the Conservator of Forests for the exploitation of the Teak Forests in the Heggadadevanakote Taluk. License fees and fees for the occupation of Travellers' Bungalows have been enhanced and orders have been issued directing the levy of fees in suits filed before the Registrar of Co-operative Societies. The fees for the -- registration of documents have been enhanced by a notification, to the standard in force in the Madras Presidency and bills for the amendment of the Mysore Stamp Regulation and the Mysore Court Fees Regulation providing for the enhancement of the Stamp Duties and Court Fees as recommended by the Committee are under consideration in the Legislative Council. The proposal to levy a super-tax is also before the same Council.

12. The Committee have prepared a forecast of revenue and expenditure for the next three years, 1923-26, as requested in the terms of reference in the Government Order constituting them. They recommend that the normal revenue of

Rs. 299 lakhs may be increased during this period to 323 lakhs of which Rs. 5 lakhs represent the enhancement under Stamp duties Court Fees and Registration Fees and Rs. 19 lakhs the normal development under other heads of revenue. The policy of Government in this respect has already been indicated in para 39 of the Dewan address to the Representative Assembly in June last. The improvement in three years anticipated in the general forecast is Rs. 56 lakhs.

13. The charges against the total revenue demand proposed by the Committee may be grouped as follows:-

(a) Normal Revenue Expenditure.		250½ lacs
(b) Interest and Sinking Fund charges.		50½ "
(c) Reserves consisting of		
Famine Fund Reserve.	5 lakhs.	
Reserve for non-recurring expenditure.	3 lakhs.	
Irrigation Capital Reserve.	3 "	
Mining Reserve.	11 "	
	----------	22 "

T o t a l.		323 lakhs
		-----

14. The policy proposed to be pursued by Government in regard to expenditure has also been fully indicated in detail in the Dewan's address presented to the Birthday Session of the Representative Assembly in June last. The policy involves a clear classification, according to their nature, of the different resources of the State and the separation of Productive works Finance from the normal administration ---

finances. The resources will in future be broadly classified under three heads comprised as follows:-

1. Normal Revenues.
2. Uncertain revenue and assets of a Capital nature.
3. Revenues from Productive Works.

It will be the endeavour of Government to meet all the charges on account of service expenditure, the Famine Insurance Fund, (Rs. 5 lakhs) and the Special Reserve for Non-recurring expenditure from the normal revenues of the State. In order that this object may be fully attained, it will be necessary to increase the normal revenues by Rs. 25 lakhs during the next three years and also reduce service expenditure exclusive of mining charges to 268 lakhs from the standard of Rs. 275¾ lakhs fixed in the budget for the current year. The action taken with a view to reduce service expenditure to the normal level has already been indicated above and the measures for the increase of revenue will receive the continuous attention of Government.

15. Government propose to utilise the Mining Revenue for building up another asset. The revenues from productive works stand at present at 45 lakhs, while the interest on loans and the Sinking Fund Contributions to be met from these revenues is 54 lakhs. Government propose to take measures to increase the revenues under productive works by 13 lakhs during the next three years. They are of opinion that the revenue from

productive works should have to meet not only the interest on the loans raised by Government to finance them, but should also provide sufficient funds for industrial experiments and irrigational developments (Industrial Development Fund Rs. 1½ lakhs and Irrigation Capital 13½ lakhs). As the increase of 13 lakhs in the revenue from productive works will not be sufficient for paying the Sinking Fund of the Loans raised to finance them, Government are taking steps to take credit to the extent of about Rs. 11 lakhs from the annual revenue Sterling Railway Loan Sinking Fund towards Sinking Fund Charges. Representations are being made to the Government of India to permit of this being done. The total improvement to be aimed at in the three years will thus be Rs. 56 lakhs per annum as follows:-

Increase in revenue. (25 lakhs under normal sources and 13 lakhs under Productive Works.)	38 lakhs.
Reduction of Expenditure.	7 "
Contribution from Sinking Fund.	11 "
	56 lakhs.

16. The Committee have submitted detailed recommendations in respect of the total grant for Capital Works Expenditure during the current year. The total amount recommended by them for the various works now under progress is Rs. 55 lakhs. The budget for the current year fixes the Capital Works Grant at Rs. 46.54 lakhs. With reference to the Bhadravati Iron Works, the

the Committee consider that as another public loan would be necessary for completing the works, further progress may be stopped in order that the cash position may not be -- embarrassed. It has already been explained in the Address of the Dewan to the Representative Assembly in June last that it will not be necessary to float another loan to complete the works and that exclusive of the sum required for working capital, the amount required for completing the urgent items can be provided for in the Normal Capital programme. Government accordingly consider that it is not correct policy at this stage to close down the works as it is anticipated that operations will begin early next year. Further information on the subject will be placed before the public at a very early date.

17. The Committee report that the Capital Demand during the next three years will roughly amount to Rs. 150 lakhs. They recommend that it should be limited to Rs. 120 lakhs at an average rate of 40 lakhs per annum so that it might be possible to finance Capital Works without recourse to another public loan. This sum of Rs. 120 lakhs is proposed to be made up of Rs. 73 lakhs representing the normal accretions of the unfunded debt viz., Savings Bank Deposits, Life Insurance Fund, the Depreciation Funds and the Mining Fund Capitalisation Reserve and of Rs. 47 lakhs being the -- aggregate of the probable surplus revenues of the Civil and Military Station and the contribution towards the Sterling Loan ---

Loan Sinking Fund during the next three years. Government are in full sympathy with the recommendations of the Committee that no public loan should be floated for carrying out the Capital Works Programme ~~during~~ for the next three years. The requirements under Capital Expenditure for Railways, Electric and Industrial Works are being carefully ascertained and ways and means for financing them will be laid down with due regard to this recommendation.

18. The main recommendations of the Committee in regard to the policy relating to public debt operations is the separation of the Sinking Fund and the Famine Reserve Fund from that maintained towards meeting the other liabilities of Government such as the Savings Bank Deposits, Insurance Fund, Local Funds etc. Orders have already been issued to the Comptroller for the separation of the securities of the Sinking Fund and the Famine Reserve Fund from those maintained for the other liabilities. Both the Sinking and the Famine Reserve Funds will be invested in full in gilt-edged securities commanding the widest market and the Comptroller has been instructed to submit an annual review in his note on the Ways and Means Estimates in order to enable Government to watch the growth of these reserves.

19. In the concluding chapter of their report, the Committee make general recommendations suggesting the delegation of powers to Heads of Departments and the simplification of office work in the Revenue and other offi-

(17

offices of the State. The Revenue Commissioner has already been invested with larger powers in order to reduce office work and correspondence and the simplification of work in Public Offices is under the active consideration of Government.

(b) With reference to the recommendation of the Committee for the speedy disposal of the darkhasts, Government have already passed orders placing an Officer on Special duty to assist the District Officers for the early settlement of long pending applications for land.

(c) The Committee suggest that the revenue under Vani Vilas Sagara is insignificant as compared with the large outlay incurred on it and suggest measures for bringing under cultivation all lands served by the channels under the Reservoir. The matter has already engaged the attention of Government and orders are about to issue on the subject.

(d) In regard to their recommendations that a Committee may be appointed to work in conjunction with the Railway Administration for the better management of the Railways, the announcement made at the last Dasara Session of the Representative Assembly regarding the appointment of Advisory Committees will fully provide for the creation of the organization proposed.

17

(e) The recommendations of the Committee in regard to the surplus revenues of the Civil and Military Station and the relief necessary in the matter of the contributions paid by the people of the State to the Imperial Exchequer by way of Customs Duties are

under the active consideration of Government.

(f) The question of the negotiability of our securities in British India urged by the Committee in their report has already been raised by Government and will be taken up again at a favourable opportunity.

(g) In regard to the recommendation of the Committee that the annual budget may be placed before both the Representative Assembly and the Legislative Council, Government have already announced the gracious decision of His Highness the Maharaja to -- permit the Legislative Council to vote on the budget and the Representative Assembly to move resolutions thereon.

20. In conclusion, Government take this opportunity of expressing their high sense of appreciation of the labours of Rajasabha Bhushana Dewan Bahadur K.P. Puttanna Chetty, C.I.E., Chairman, and the other non-official members of the Committee for their luminous survey of the financial position of the -- State and the great pains they have bestowed in passing under review the expenditure of every department of the State, in their endeavour to correlate sound finance with -- administrative efficiency. Their report has not only been helpful to Government in the matter of effecting economies in expenditure but has also served a larger purpose, viz., the re-examination of the utility and efficiency of all Government activities from the

standpoint

of cost to the general taxpayer and also helped towards the formation of a correct public opinion on the true situation regarding the finances of the State.

3. Final report of the Special Finance Committee, dated 31st July 1922, suggesting proposals for balancing the budget and furnishing a forecast of revenue and expenditure with general observations and recommendations on important points brought to light during their investigation.

ORDER NO. , DATED ~~7th December 1922~~ January 1923.

The Special Finance Committee was appointed under Government Order No. 4899-958—C B 171-21-1, dated 3rd February 1922. As the course of expenditure during the last year indicated that it would end with a heavy deficit instead of a small surplus anticipated when the budget was prepared and it appeared that the position was not likely to improve during the next and succeeding years, the Committee were requested by Government to undertake a detailed and continuous investigation into the finances of the State and submit recommendations on the following points :—

(i) Review of the State's Finances for the past five years with a view to ascertain the causes of the deficit in the revenue position.

(ii) Formulation of proposals for wiping out the deficit and restoring financial equilibrium,

(*a*) by retrenchment and economy of expenditure without impairing the efficiency of the essential services, and

(*b*) by improvement of revenue and resources including enhanced additional taxation if found unavoidable.

(iii) Preparation of a forecast of revenue and expenditure for the next three years so as to result in a balanced budget after providing for necessary financial reserves such as Famine Reserve, and Sinking Fund for Loans, as well as for renewals and replacements of the State Railways.

(iv) Preparation of a forecast of Capital Demands under all heads for the next three years with reference to the resources (including loans) that may be counted upon.

(v) Examination of the past policy in regard to Public Debt and Investments and Ways and Means operations including utilization of Reserve and Depreciation Funds, and suggesting changes if considered necessary.

answer.

No. , DATED 1922.

2. ~~At the special request of Government, the~~ Committee submitted on the 31st May 1922 an Interim Report of their recommendations which was placed before the Birthday Session of the Representative Assembly as well as the Legislative Council which met soon after. The Final Report of the Committee was received by Government on the 1st August 1922 and Government now proceed to review the same.

3. In their review of the State's Finances during the past five years in accordance with the first term of reference ~~in the order dated 3rd February 1922~~, the Committee trace the course of revenue and expenditure for the quinquennium ending with the year 1920-21. They report that the revenues during the period ranged between Rs. 294·24 lakhs and Rs. 315·25 lakhs while the expenditure rose continuously from Rs. 243·37 lakhs, to Rs. 336·33 lakhs, so that, during the last year of the quinquennium the expenditure was in excess of the revenue by Rs. 23·20 lakhs. This, however, did not include the contributions to essential reserves which amounted to Rs. 20·40 lakhs. The real shortage, according to the Committee, in the last year of the quinquennium was therefore Rs. 43·60 lakhs. They consider that the position during the year 1921-22 was rendered worse by the fact that although the departmental expenditure was reduced by over Rs. 29 lakhs, the large loan of Rs. 2¼ crores raised during the year threw the burden of heavy Interest and Sinking Fund charges on the normal revenues of the State.

4. The Committee have summarised the causes which have rendered the State's financial position unsound, as follows :—

(i) Sufficient attention was not paid to the development of certain permanent sources of revenue, such as Land Revenue and Stamps. The revision settlement of the districts has not received adequate attention.

(ii) Want of due appreciation ~~as~~ between stable and unstable sources of revenue in the matter of utilising them for permanent or recurring expenditure.

(iii) Utilising the entire receipts from Mining Royalty as a normal item of revenue for ordinary administration.

(iv) Raising the standard of service expenditure out of all proportion to the average level of ordinary revenue.

(v) The starting of new services and expansion of activities of old service departments simultaneously on a large scale.

(vi) Undertaking construction of numerous large buildings and other works without reference to the money available for completing them.

(vii) Simultaneous undertaking of a number of large capital works without reference to the resources available for financing them.

(viii) Raising of large loans for expenditure on projects which have proved wholly unproductive or which yield only a small fraction of the expected return and the consequent loss of interest income and the creation of an unproductive debt, the service of which is a burden on ordinary revenues.

(ix) Increase in the cost of establishment and of supplies and services on account of rise in prices and wages.

5. In formulating their proposals for wiping out the deficit, the Committee assume that the annual revenues of the State according to present resources amount to Rs. 299 lakhs while the demands under service expenditure inclusive of Sinking Funds and necessary reserves amount to Rs. 341 lakhs resulting in a deficit of 42 lakhs. They have reviewed the expenditure under all the departments of Government in great detail and have submitted 41 resolutions recommending retrenchments in recurring expenditure to the extent of Rs. 35·70 lakhs. They also propose ~~an~~ improvement in revenue resources, particularly under Forest Revenue to the extent of Rs. 3·64 lakhs and ~~suggest an enhancement of the~~ Stamp Duty, ~~the~~ Court Fees, and ~~the~~ Registration Fees, to the extent of about Rs. 5 lakhs in order to bridge the gap between Revenue and Expenditure.

6. Government have already passed orders on the recommendations submitted by the Committee in their several resolutions. It is not necessary now to refer to them in detail. It will be sufficient if the general effect of the retrenchments already ordered is indicated in brief.

7. The standard of expenditure for Service Departments assumed by the Committee in framing their proposals is Rs. 285·5 lakhs which the Committee propose to reduce by retrenchments to a level of about Rs. 250·5 lakhs per annum. Government observe that the standard adopted by the Committee, based as it mainly has been on the budget estimates for 1921-22, corresponds neither with the actual expenditure of the year 1920-21, the last year of the quinquennium dealt with in their review, nor with the revised estimates of the succeeding year (1921-22),

No. , dated 192

8. The orders passed by Government on the different recommendations of the Committee in the matter of retrenchment would, in the ordinary course, have brought down the level of service expenditure by Rs. 15 lakhs below the standard of 285½ lakhs assumed by the Committee *i. e.*, to 270½ lakhs. But as the standard of expenditure adopted by the Committee as a basis of their recommendations was much lower than the actual level of service charges, a comparison of the actual service expenditure in 1920-21, (the last year of the quinquennium surveyed in the Committee's report,) with the allotments made in the budget of the current year is necessary to indicate the full extent of the net retrenchments already effected. The total allotment for service expenditure fixed in the budget for the current year inclusive of the charges on account of Mining Revenue is Rs. 278·24 lakhs and as compared with the expenditure of Rs. 322·36 lakhs actually incurred in 1920-21, it represents a general reduction in service charges to the extent of Rs. 44·12 lakhs. It may also be pointed out that the retrenchment of Rs. 44·12 lakhs already effected includes a total sum of Rs. 10½ lakhs out of the reductions ordered as a result of the recommendations of the Committee. Further reductions to the extent of 4½ lakhs have been ordered on their proposals since the budget was fixed and will be given effect to in the course of the year, bringing the level of service expenditure to Rs. 273¾ lakhs. Therefore the total retrenchments already effected during the two years amount to Rs. 48·60 lakhs representing a reduction of 15% of total service charges and 19% of the part of such charges open to reduction.

9. The minimum level, in the opinion of Government, to which the service expenditure of the State can be reduced with safety has already been indicated in the Dewan's Birthday Address presented to the Representative Assembly. Inclusive of the charges on account of Mining Revenue, the minimum level of service expenditure has been fixed at Rs. 270 lakhs. Proposals for effecting a further savings of about Rs. 3¾ lakhs are under the consideration of Government.

10. It may be pointed out that the reductions in service expenditure already effected and ordered involve the abolition of approximately the following number of posts in Government Service:—

Gazetted posts	74
Posts of Executive Subordinates	396
Ministerial ranks	178
Menials	977
	1,625

11. With reference to the recommendations of the Committee for the improvement of the resources of the State an additional grant of Rs. 50,000 has been placed in the budget of the current year at the disposal of the Conservator of Forests for the exploitation of the Teak Forests in the Heggaddevankote Taluk. License fees and fees for the occupation of travellers' bunglows have been enhanced and orders have been issued directing the levy of fees on suits filed before the Registrar of Co-operative Societies. The fees for the registration of documents have been enhanced by a notification to the standard in force in the Madras Presidency and bills for the amendment of the Mysore Stamp Regulation and the Mysore Court Fees Regulation providing for the enhancement of the Stamp Duties and Court Fees as recommended by the Committee are under consideration in the Legislative Council. The proposal to levy a super-tax is also before the same Council.

12. The Committee have prepared a forecast of revenue and expenditure for the next three years, 1923 to 26, as requested in the terms of reference in the Government Order constituting them. They recommend that the normal revenue of Rs. 299 lakhs may be increased during this period to 323 lakhs of which Rs. 5 lakhs represent the enhancement under Stamp duties, Court Fees and Registration Fees and Rs. 19 lakhs the normal development under other heads of revenue. The policy of Government in this respect has already been indicated in para 39 of the Dewan's Address to the Representative Assembly in June last. The improvement in three years anticipated in the general forecast is Rs. 56 lakhs.

13. The charges against the total revenue demand proposed by the Committee may be grouped as follows:—

(*a*) Normal Revenue Expenditure ..		...	250½ lakhs
(*b*) Interest and Sinking Fund charges ..		...	50½ "
(*c*) Reserves consisting of—			
Famine Fund Reserve ..	5		
Reserve for non-recurring expenditure ...	3		
Irrigation Capital Reserve ...	3		22 "
Mining Reserve	11		
Total			323 lakhs

No. DATED

14. The policy proposed to be pursued by Government in regard to expenditure has also been fully indicated in detail in the Dewan's Address presented to the Birthday Session of the Representative Assembly in June last. The policy involves a clear classification, according to their nature, of the different resources of the State and the separation of Productive Works Finance from the Normal Administration Finances. The resources will in future be broadly classified under three heads comprised as follows:—

1. Normal Revenues.
2. Uncertain revenue and assets of a Capital nature.
3. Revenues from Productive Works.

It will be the endeavour of Government to meet all the charges on account of Service Expenditure, the Famine Insurance Fund, (Rs. 5 lakhs) and the Special Reserve for non-recurring expenditure, from the normal revenues of the State. In order that this object may be fully attained, it will be necessary to increase the normal revenues by Rs. 25 lakhs during the next three years and also reduce service expenditure exclusive of mining charges to 268 lakhs from the standard of Rs. 275¾ lakhs fixed in the budget for the current year. The action taken with a view to reduce service expenditure to the normal level has already been indicated above and the measures for the increase of revenue will receive the continuous attention of Government.

15. Government propose to utilise the Mining Revenue for building up another asset. The revenues from productive works stand at present at 45 lakhs, while the Interest on Loans and the Sinking Fund Contributions to be met from these revenues is 54 lakhs. Government propose to take measures to increase the revenues under productive works by 13 lakhs during the next three years. They are of opinion that the revenue from productive works should have to meet not only the interest on the loans raised by Government to finance them, but should also provide sufficient funds for industrial experiments and irrigational developments (Industrial Development Fund Rs. 1½ lakhs and Irrigation Capital 13½ lakhs). As the increase of 13 lakhs in the revenue from productive works will not be sufficient for paying the Sinking Fund of the Loans raised to finance them, Government are taking steps to take credit to the extent of about Rs. 11 lakhs from the annual revenues of Sterling Railway Loan Sinking Fund towards Sinking Fund Charges. Representations are being made to the Government of India to permit of this being done. The total improvement to be aimed at in the three years will thus be Rs. 56 lakhs per annum as follows .—

Increase in revenue (25 lakhs under normal sources and 13 lakhs under productive works)	38 lakhs
Reduction of Expenditure	7 ,,
Contribution from Sinking Fund	11 ,,
	56 lakhs

16. The Committee have submitted detailed recommendations in respect of the total grant for Capital Works Expenditure during the current year. The total amount recommended by them for the various works now under progress is Rs. 55 lakhs. The budget for the current year fixes the Capital Works Grant at Rs. 46·54 lakhs. With reference to the Bhadravati Iron Works, the Committee consider that as another public loan would be necessary for completing the works, further progress may be stopped in order that the cash position may not be embarrassed. It has already been explained in the Address of the Dewan to the Representative Assembly in June last that it will not be necessary to float another loan to complete the works and that exclusive of the sum required for working capital, the amount required for completing the urgent items can be provided for in the Normal Capital programme. Government accordingly consider that it is not correct policy at this stage to close down the works as it is anticipated that operations will begin early next year. Further information on the subject will be placed before the public at a very early date.

17. The Committee report that the Capital Demand during the next three years will roughly amount to Rs. 150 lakhs. They recommend that it should be limited to Rs. 120 lakhs at an average rate of 40 lakhs per annum so that it might be possible to finance Capital Works without recourse to another public loan. This sum of Rs. 120 lakhs is proposed to be made up of Rs. 73 lakhs representing the normal accretions of the unfunded debt *viz*., Savings Bank Deposits, Life Insurance Fund, the Depreciation Funds and the Mining Fund Capitalisation Reserve and of Rs. 47 lakhs being the aggregate of the probable surplus revenues of the Civil and Military Station and the contribution towards the Sterling Loan Sinking Fund during the next three years. Government are in full sympathy with the recommendations of the Committee that no public loan should be floated for carrying out the Capital Works Programme for the next three years. The requirements under Capital Expenditure for Railways, Electric and Industrial Works are being carefully ascertained and Ways and Means for financing them will be laid down with due regard to this recommendation.

No. DATED 1922.

18. The main recommendations of the Committee in regard to the policy relating to public debt operations is the separation of the Sinking Fund and the Famine Reserve Fund from that maintained towards meeting the other liabilities of Government such as the Savings Bank Deposits, Insurance Fund, Local Funds, etc. Orders have already been issued to the Comptroller for the separation of the securities of the Sinking Fund and the Famine Reserve Fund from those maintained for the other liabilities. Both the Sinking and the Famine Reserve Funds will be invested in full in gilt-edged securities commanding the widest market and the Comptroller has been instructed to submit an annual review in his note on the Ways and Means Estimates in order to enable Government to watch the growth of these reserves.

19. In the concluding chapter of their report, the Committee make general recommendations suggesting the delegation of powers to Heads of Departments and the simplification of office work in the Revenue and other offices of the State. The Revenue Commissioner has already been invested with larger powers in order to reduce office work and correspondence and the simplification of work in Public Offices is under the active consideration of Government.

(*a*) With reference to the recommendation of the Committee for the speedy disposal of the darkhasts, Government have already passed orders placing an officer on special duty to assist the District officers for the early settlement of long-pending applications for land.

(*b*) The Committee suggest that the revenue under Vani Vilas Sagara is insignificant as compared with the large outlay incurred on it and suggest measures for bringing under cultivation all lands served by the channels under the Reservoir. The matter has already engaged the attention of Government and orders are about to issue on the subject.

(*c*) In regard to their recommendation that a Committee may be appointed to work in conjunction with the Railway Administration for the better management of the Railways, the announcement made at the last Dasara Session of the Representative Assembly regarding the appointment of Advisory Committees will fully provide for the creation of the organization proposed.

(*d*) The recommendations of the Committee in regard to the surplus revenues of the Civil and Military Station and the relief necessary in the matter of the contributions paid by the people of the State to the Imperial Exchequer by way of customs duties are under the active consideration of Government.

(*e*) The question of the negotiability of our securities in British India urged by the Committee in their report has already been raised by Government and will be taken up again at a favourable opportunity.

(*f*) In regard to the recommendation of the Committee that the annual budget may be placed before both the Representative Assembly and the Legislative Council, Government have already announced the gracious decision of His Highness the Maharaja to permit the Legislative Council to vote on the budget and the Representative Assembly to move resolutions thereon.

20. In conclusion, Government take this opportunity of expressing their high sense of appreciation of the labours of Rajasabhā Bhushana Dewan Bahadur K. P. Puttanna Chetty, C. I. E., Chairman, and the other non-official members of the Committee for their luminous survey of the financial position of the State and the great pains they have bestowed in passing under review the expenditure of every department of the State, in their endeavour to correlate sound finance with administrative efficiency. Their report has not only been helpful to Government in the matter of effecting economies in expenditure but has also served a larger purpose, *viz.*, the re-examination of the utility and efficiency of all Government activities from the standpoint of cost to the general tax-payer and also helped towards the formation of a correct public opinion on the true situation regarding the finances of the State.

3. Final report of the Special Finance Committee, dated 31st July 1922, making proposals for balancing the budget and furnishing a forecast of revenue and expenditure with general observations and recommendations on important points brought to light during their investigation.

ORDER NO. , DATED JANUARY 1923.

The Special Finance Committee was appointed under Government Order No. 4899-958—C B 171-21-1, dated 3rd February 1922. As the course of expenditure during the last year indicated that it would end with a heavy deficit instead of a small surplus as anticipated when the budget was prepared, and it appeared that the position was not likely to improve during the next and succeeding years, the Committee were requested by Government to undertake a detailed and continuous investigation into the finances of the State and submit recommendations on the following points :—

(i) Review of the State's Finances for the past five years with a view to ascertain the causes of the deficit in the revenue position.

(ii) Formulation of proposals for wiping out the deficit and restoring financial equilibrium,

(*a*) by retrenchment and economy of expenditure without impairing the efficiency of the essential services, and

(*b*) by improvement of revenue and resources including enhanced additional taxation if found unavoidable.

(iii) Preparation of a forecast of revenue and expenditure for the next three years so as to result in a balanced budget after providing for necessary financial reserves such as Famine Reserve, and Sinking Fund for Loans, as well as for renewals and replacements of the State Railways.

(iv) Preparation of a forecast of Capital Demands under all heads for the next three years with reference to the resources (including loans) that may be counted upon.

(v) Examination of the past policy in regard to Public Debt and Investments and Ways and Means operations including utilization of Reserve and Depreciation Funds, and suggesting changes if considered necessary.

No. DATED 1923.

2. The Committee submitted on the 31st May 1922 an Interim Report of their recommendations, which was placed before the Birthday Session of the Representative Assembly as well as the Legislative Council which met soon after. The Final Report of the Committee was received by Government on the 1st August 1922 and Government now proceed to review the same.

3. In their review of the State's Finances during the past five years in accordance with the first term of reference, the Committee trace the course of revenue and expenditure for the quinquennium ending with the year 1920-21. They report that the revenues during the period ranged between Rs. 294·24 lakhs and Rs. 315·25 lakhs while the expenditure rose continuously from Rs. 243·37 lakhs, to Rs. 336·33 lakhs, so that, during the last year of the quinquennium the expenditure was in excess of the revenue by Rs. 23·20 lakhs. This, however, did not include the contributions to essential reserves which amounted to Rs. 20·40 lakhs. The real shortage, according to the Committee, in the last year of the quinquennium was therefore Rs. 43·60 lakhs. They consider that the position during the year 1921-22 was rendered worse by the fact that although the departmental expenditure was reduced by over Rs. 29 lakhs, the large loan of Rs. 2½ crores raised during the year threw the burden of heavy interest and Sinking Fund charges on the normal revenues of the State.

4. The Committee have summarised the causes which have rendered the State's financial position unsound, as follows :—

(i) Sufficient attention was not paid to the development of certain permanent sources of revenue, such as Land Revenue and Stamps. The revision of settlements has not received adequate attention.

(ii) Want of due appreciation as between stable and unstable sources of revenue in the matter of utilising them for permanent or recurring expenditure.

(iii) Utilising the entire receipts from Mining Royalty as a normal item of revenue for ordinary administration.

(iv) Raising the standard of service expenditure out of all proportion to the average level of ordinary revenue.

(v) The starting of new services and expansion of activities of old service departments simultaneously on a large scale.

(vi) Undertaking the construction of numerous large buildings and other works without reference to the money available for completing them.

(vii) Simultaneous undertaking of a number of large capital works without reference to the resources available for financing them.

(viii) Raising of large loans for expenditure on projects which have proved wholly unproductive or which yield only a small fraction of the expected return and the consequent loss of interest income and the creation of an unproductive debt, the service of which is a burden on ordinary revenues.

(ix) Increase in the cost of establishment and of supplies and services on account of rise in prices and wages.

5. In formulating their proposals for wiping out the deficit, the Committee assume that the annual revenues of the State according to present resources amount to Rs. 299 lakhs while the demands under service expenditure inclusive of Sinking Funds and necessary reserves amount to Rs. 341 lakhs resulting in a deficit of 42 lakhs. They have reviewed the expenditure under all the departments of Government in great detail and have submitted 41 resolutions recommending retrenchments in recurring expenditure to the extent of Rs. 35·70 lakhs. They also propose measures for improvement in revenue resources particularly under Forest Revenue to the extent of Rs. 3·64 lakhs and under Stamp Duty, Court Fees, and Registration Fees to the extent of about Rs. 5 lakhs in order to bridge the gap between revenue and expenditure.

6. Government have already passed orders on the recommendations submitted by the Committee in their several resolutions. It is not necessary now to refer to them in detail. It will be sufficient if the general effect of the retrenchments already ordered is indicated in brief.

7. The standard of expenditure for Service Departments assumed by the Committee in framing their proposals is Rs. 285·5 lakhs which the Committee propose to reduce by retrenchments to a level of about Rs. 250·5 lakhs per annum. Government observe that the standard adopted by the Committee, based as it mainly has been on the budget estimates for 1921-22, corresponds neither with the actual expenditure of the year 1920-21, the last year of the quinquennium dealt with in their review, nor with the revised estimates of the succeeding year (1921-22).

No. , dated 1923.

8. The orders passed by Government on the different recommendations of the Committee in the matter of retrenchment would, in the ordinary course, have brought down the level of service expenditure by Rs. 15 lakhs below the standard of 285½ lakhs assumed by the Committee *i. e.*, to 270½ lakhs. But as the standard of expenditure adopted by the Committee as a basis of their recommendations was much lower than the actual level of service charges, a comparison of the actual service expenditure in 1920-21, ~~the last year of the quinquennium surveyed in the Committee's report,~~ with the allotments made in the budget of the current year is necessary to indicate the full extent of the net retrenchments already effected. The total allotment for service expenditure fixed in the budget for the current year inclusive of the charges against Mining Revenue is Rs. 278·24 lakhs and as compared with the expenditure of Rs. 322·36 lakhs actually incurred in 1920-21, it represents a general reduction in service charges to the extent of Rs. 44·12 lakhs. It may also be pointed out that the retrenchment of Rs. 44·12 lakhs already effected includes a total sum of Rs. 10½ lakhs out of the reductions ordered on the recommendations of the Committee. Further reductions to the extent of 4½ lakhs have been ordered on their proposals since the budget was fixed and will be given effect to in the course of the year, bringing the level of service expenditure to Rs. 273¾ lakhs. ~~Therefore~~ the total retrenchments already effected during the two years amount to Rs. 48·60 lakhs representing a reduction of 15% of the total service charges and 19% of the part of such charges open to reduction.

9. The minimum level, in the opinion of Government, to which the service expenditure of the State can be reduced with safety has already been indicated in the Dewan's Address presented to the Representative Assembly in June last. Inclusive of the charges against ~~of~~ Mining Revenue, the minimum level of service expenditure has been fixed at Rs. 270 lakhs. Proposals for effecting a further reduction ~~of~~ about Rs. 3¾ lakhs are under the consideration of Government.

10. It may be pointed out that the reductions in service expenditure already effected and ordered involve the abolition of approximately the following number of posts in Government Service:—

Gazetted posts	..	74
Posts of Executive Subordinates ..	..	396
Ministerial ranks	..	178
Menials	..	977
		1,625

11. With reference to the recommendations of the Committee for the improvement of the resources of the State an additional grant of Rs. 50,000 has been placed in the budget of the current year at the disposal of the Conservator of Forests for the exploitation of the teak forests in the Heggaddevankote Taluk. License fees and fees for the occupation of travellers' bunglows have been enhanced and orders have been issued directing the levy of fees in suits filed before the Registrar of Co-operative Societies. The fees for the registration of documents have been enhanced by a notification to the standard in force in the Madras Presidency and bills for the amendment of the Mysore Stamp Regulation and the Mysore Court Fees Regulation providing for the enhancement of Stamp Duties and Court Fees as recommended by the Committee have alredy passed through the Legislative Council. The proposal to levy a super-tax is also before the same Council.

12. The Committee have prepared a forecast of revenue and expenditure for the next three years, 1923 to 1926, as requested in the terms of reference. They recommend that the normal revenue of Rs. 299 lakhs may be increased during this period to 323 lakhs of which Rs. 5 lakhs represent the enhancement under Stamp duties, Court Fees and Registration Fees and Rs. 19 lakhs the normal development under other heads of revenue. The policy of Government in this respect has already been indicated in para 39 of the Dewan's Address to the Representative Assembly. The improvement in three years anticipated in the general forecast is Rs. 56 lakhs.

13. The charges against the total revenue demand proposed by the Committee may be grouped as follows:—

(*a*) Normal Revenue Expenditure			250½ lakhs
(*b*) Interest and Sinking Fund charges ...		...	50½ "
(*c*) Reserves consisting of—			
Famine Fund Reserve ..	5		
Reserve for non-recurring expenditure ...	3		22
Irrigation Capital Reserve ...	3		
Mining Reserve	11		
Total ...			323 lakhs

VI

(2)

VII (2)

(4)

No. DATED 1923.

14. The policy proposed to be pursued by Government in regard to expenditure has also been fully indicated in detail in the Dewan's Address, presented to the Representative Assembly in June last. This policy involves a clear classification, according to their nature, of the different resources of the State and the separation of Productive Works Finance from the Normal Administrative Finances. The resources will in future be broadly classified under three heads comprised as follows:—

1. Normal Revenues.
2. Uncertain revenue and assets of a Capital nature.
3. Revenues from Productive Works.

It will be the endeavour of Government to meet all the charges on account of Service Expenditure, the Famine Insurance Fund, (Rs. 5 lakhs) and the Special Reserve for non-recurring expenditure, from the normal revenues of the State. In order that this object may be fully attained, it will be necessary to increase the normal revenues by Rs. 25 lakhs during the next three years and also reduce service expenditure exclusive of the charges against mining revenue to Rs. 268 lakhs from the standard of Rs. 275¾ lakhs fixed in the budget for the current year. The action taken with a view to reduce service expenditure to the normal level has been indicated above and the measures for the increase of revenue will receive the continuous attention of Government.

15. Government propose to utilise the Mining Revenue for building up another asset. The revenues from productive works stand at present at Rs. 45 lakhs, while the Interest on Loans and the Sinking Fund Contributions to be met from these revenues is Rs. 54 lakhs. Government propose to take measures to increase the revenues under productive works by Rs. 13 lakhs during the next three years. They are of opinion that the revenue from productive works should have to meet not only the interest on the loans raised by Government to finance them, but should also provide sufficient funds for industrial experiments and irrigational developments (Industrial Development Fund Rs. 1½ lakhs and Irrigation Capital 13½ lakhs). As the increase of 13 lakhs in the revenue from productive works will not be sufficient for paying the Sinking Fund of the Loans raised to finance them, Government are taking steps to take credit to the extent of about Rs. 11 lakhs annually from the Sterling Railway Loan Sinking Fund towards Sinking Fund Charges. Representations are being made to the Government of India to permit of this being done. The total improvement to be aimed at in the three years will thus be Rs. 56 lakhs per annum as follows :—

Increase in revenue (25 lakhs under normal sources and 13 lakhs under productive works.)	38 lakhs
Reduction of Expenditure	... 7 ,,
Contribution from Sterling Loan Sinking Fund	... 11 ,,
	56 lakhs

16. The Committee have submitted detailed recommendations in respect of the total grant for Capital Works Expenditure during the current year. The total amount recommended by them for the various works now under progress is Rs. 55 lakhs. The budget for the current year fixes the Capital Works Grant at Rs. 46·54 lakhs. With reference to the Bhadravati Iron Works, the Committee consider that as another public loan would be necessary for completing the works, further progress may be stopped in order that the cash position may not be embarrassed. It has already been explained in the Address of the Dewan to the Representative Assembly in June last that it will not be necessary to float another loan to complete the works and that exclusive of the sum required for working capital, the amount required for completing the urgent items can be provided for in the Normal Capital programme. Government accordingly consider that it is not correct policy at this stage to close down the works as it is anticipated that operations will begin during the course of the month. Further information on the subject will be placed before the public at a very early date.

17. The Committee report that the Capital demand during the next three years will roughly amount to Rs. 150 lakhs. They recommend that it should be limited to Rs. 120 lakhs at an average rate of 40 lakhs per annum so that it might be possible to finance capital works without recourse to another public loan. This sum of Rs. 120 lakhs is proposed to be made up of Rs. 73 lakhs representing the normal accretions of the unfunded debt *viz.*, Savings Bank Deposits, Life Insurance Fund, the Depreciation Funds and the Mining Fund Capitalisation Reserve and of Rs. 47 lakhs being the aggregate of the probable surplus revenues of the Civil and Military Station and the contribution from the Sterling Loan Sinking Fund during the next three years. Government are in full sympathy with the recommendations of the Committee that no public loan should be floated for carrying out the Capital Works Programme for the next three years. The requirements for the next 3 years under Capital Expenditure for Railways, Electric and Industrial Works are being carefully ascertained and Ways and Means for financing them will be laid down with due regard to this recommendation.

No. DATED 1923.

18. The main recommendations of the Committee in regard to the policy relating to public debt operations is the separation of the Sinking Fund and the Famine Reserve Fund from ~~that~~ maintained towards meeting the other liabilities of Government such as the Savings Bank Deposits, Insurance Fund, Local Funds, etc. Orders have already been issued to the Comptroller for the separation of the securities of the Sinking Fund and the Famine Reserve Fund from those maintained for the other liabilities. Both the Sinking and the Famine Reserve Funds will be invested in full in gilt-edged securities commanding the widest market and the Comptroller has been instructed to submit an annual review in his note on the Ways and Means Estimates in order to enable Government to watch the growth of these reserves.

19. In the concluding chapter of their report, the Committee make general recommendations suggesting the delegation of powers to Heads of Departments and the simplification of office work in the Revenue and other offices of the State. The Revenue Commissioner has already been invested with larger powers in order to reduce office work and correspondence and the simplification of work in all Public Offices is under the active consideration of Government.

(*a*) With reference to the recommendation of the Committee for the speedy disposal of darkhasts, Government have already passed orders placing an officer on special duty to assist the District officers for the early settlement of long pending applications for land.

(*b*) The Committee observe that the revenue under the Vani Vilas Sagara is insignificant as compared with the large outlay incurred on it and suggest measures for bringing under cultivation all lands served by the channels under the Reservoir. The matter has already engaged the attention of Government and orders are about to issue on the subject.

(*c*) In regard to their recommendation that a Committee may be appointed to work in conjunction with the Railway Administration for the better management of the Railways, the announcement made at the last Dasara Session of the Representative Assembly regarding the appointment of Advisory Committees will fully provide for the creation of the organization proposed.

(*d*) The recommendations of the Committee in regard to the surplus revenues of the Civil and Military Station and the relief necessary in the matter of the contributions paid by the people of the State to the Imperial Exchequer by way of customs duties are under the active consideration of Government.

(*e*) The question of the negotiability of our securities in British India urged by the Committee in their report has already been raised by Government and will be taken up again at a favourable opportunity.

(*f*) In regard to the recommendation of the Committee that the annual budget may be placed before both the Representative Assembly and the Legislative Council, Government have already announced the gracious decision of His Highness the Maharaja to permit the Legislative Council to vote on the budget and the Representative Assembly to move resolutions thereon.

20. In conclusion, Government take this opportunity of expressing their high sense of appreciation of the labours of Rajasabha Bhushana Diwan Bahadur K. P. Puttanna Chetty, C. I. E., Chairman, and the other non-official members of the Committee for their luminous survey of the financial position of the State and the great pains they have ~~bes~~ taken in ~~towed~~ passing under review the expenditure of every department of the State, in their endeavour to correlate sound finance with administrative efficiency. Their report has not only been helpful to Government in the matter of effecting economies in expenditure but has also served a larger purpose, *viz.*, the re-examination of the utility and efficiency of all Government activities from the standpoint of cost to the general tax-payer and also helped towards the formation of a correct public opinion on the true situation regarding the finances of the State.

Government Order No. Fl 2286-335—G F 32-22-1, dated 6th September 1922.	Retrenchments in the Comptroller's Office.
Government Order No. L 2397-458—A & E 51-22-1, dated 14th September 1922.	Retrenchments in the Departments of Agriculture, Gardens and Sericulture.
Government Order No. O 313-75—G M 14-22-1, dated 12th July 1922.	Revising the fees for the occupation of first and second class travellers' bungalows.
Government Order No. 70-120—Camp Mysore, dated 7th October 1922.	Revising the rates of travelling allowances.
Notification No. P 34—Regis 27-21-3, dated 4th July 1922.	Revising registration fees.

3. Final report of the Special Finance Committee, dated 31st July 1922, making proposals for balancing the budget and furnishing a forecast of revenue and expenditure with general observations and recommendations on important points brought to light during their investigation.

Order No. 4105-54—C. B. 163-22-1, dated 13th January 1923.

The Special Finance Committee was appointed under Government Order No. 4899-958—C B 171-21-1, dated 3rd February 1922. As the course of expenditure during the last year indicated that it would end with a heavy deficit instead of a small surplus as anticipated when the budget was prepared and it appeared that the position was not likely to improve during the next and succeeding years, the Committee were requested by Government to undertake a detailed and continuous investigation into the finances of the State and submit recommendations on the following points :—

(i) Review of the State's Finances for the past five years with a view to ascertain the causes of the deficit in the revenue position.

(ii) Formulation of proposals for wiping out the deficit and restoring financial equilibrium,

(*a*) by retrenchment and economy of expenditure without impairing the efficiency of the essential services, and

(*b*) by improvement of revenue and resources including enhanced additional taxation if found unavoidable.

(iii) Preparation of a forecast of revenue and expenditure for the next three years so as to result in a balanced budget after providing for necessary financial reserves such as Famine Reserve, and Sinking Fund for Loans, as well as for renewals and replacements of the State Railways.

(iv) Preparation of a forecast of Capital Demands under all heads for the next three years with reference to the resources (including loans) that may be counted upon.

(v) Examination of the past policy in regard to Public Debt and Investments and Ways and Means operations including utilization of Reserve and Depreciation Funds and suggesting changes if considered necessary.

No. 4105-54—C. B. 163-22-1, dated 13th January 1923.

2. The Committee submitted on the 31st May 1922 an Interim Report of their recommendations, which was placed before the Birthday Session of the Representative Assembly as well as the Legislative Council which met soon after. The Final Report of the Committee was received by Government on the 1st August 1922 and Government now proceed to review the same.

3. In their review of the State's Finances during the past five years in accordance with the first term of reference, the Committee trace the course of revenue and expenditure for the quinquennium ending with the year 1920-21. They report that the revenues during the period ranged between Rs. 294·24 lakhs and Rs. 315·25 lakhs, while the expenditure rose continuously from Rs. 243·37 lakhs, to Rs. 336·33 lakhs, so that, during the last year of the quinquennium the expenditure was in excess of the revenue by Rs. 23·20 lakhs. This, however, did not include the contributions to essential reserves which amounted to Rs. 20·40 lakhs. The real shortage, according to the Committee, in the last year of the quinquennium was therefore Rs. 43·60 lakhs. They consider that the position during the year 1921-22 was rendered worse by the fact that although the departmental expenditure was reduced by over Rs. 29 lakhs, the large loan of Rs. 2¼ crores raised during the year threw the burden of heavy interest and Sinking Fund charges on the normal revenues of the State.

4. The Committee have summarised the causes which have rendered the State's financial position unsound, as follows :—

(i) Sufficient attention was not paid to the development of certain permanent sources of revenue, such as Land Revenue and Stamps. The revision of settlements has not received adequate attention.

(ii) Want of due appreciation as between stable and unstable sources of revenue in the matter of utilising them for permanent or recurring expenditure.

(iii) Utilising the entire receipts from Mining Royalty as a normal item of revenue for ordinary administration.

(iv) Raising the standard of service expenditure out of all proportion to the average level of ordinary revenue.

(v) The starting of new services and expansion of activities of old service departments simultaneously on a large scale.

(vi) Undertaking the construction of numerous large buildings and other works without reference to the money available for completing them.

(vii) Simultaneous undertaking of a number of large capital works without reference to the resources available for financing them.

(viii) Raising of large loans for expenditure on projects which have proved wholly unproductive or which yield only a small fraction of the expected return and the consequent loss of interest income and the creation of an unproductive debt, the service of which is a burden on ordinary revenues.

(ix) Increase in the cost of establishment and of supplies and services on account of rise in prices and wages.

5. In formulating their proposals for wiping out the deficit, the Committee assume that the annual revenues of the State according to present resources amount to Rs. 299 lakhs, while the demands under service expenditure inclusive of Sinking Funds and necessary reserves amount to Rs. 341 lakhs resulting in a deficit of 42 lakhs. They have reviewed the expenditure under all the departments of Government in great detail and have submitted 41 resolutions recommending retrenchments in recurring expenditure to the extent of Rs. 35·70 lakhs. They also propose measures for improvement in revenue resources particularly under Forest Revenue to the extent of Rs. 3·64 lakhs and under Stamp Duty, Court Fees, and Registration Fees to the extent of about Rs. 5 lakhs in order to bridge the gap between revenue and expenditure.

6. Government have already passed orders on the recommendations submitted by the Committee in their several resolutions. It is not necessary now to refer to them in detail. It will be sufficient if the general effect of the retrenchments already ordered is indicated in brief.

7. The standard of expenditure for Service Departments assumed by the Committee in framing their proposals is Rs. 285·5 lakhs which the Committee propose to reduce by retrenchments to a level of about Rs. 250·5 lakhs per annum. Government observe that the standard adopted by the Committee, based as it mainly has been on the budget estimates for 1921-22, corresponds neither with the actual expenditure of the year 1920-21, the last year of the quinquennium dealt with in their review, nor with the revised estimates of the succeeding year (1921-22).

8. The orders passed by Government on the different recommendations of the Committee in the matter of retrenchment would, in the ordinary course, have brought down the level of service expenditure by Rs. 15 lakhs below the standard of 285½ lakhs assumed by the Committee, *i.e.*, to 270½ lakhs. But as the standard of expenditure adopted by the Committee as a basis of their recommendations was much lower than the actual level of service charges, a comparison of the actual service expenditure in 1920-21, the last year of the quinquennium surveyed in the Committee's report, with the allotments made in the budget of the current year is necessary to indicate the full extent of the net retrenchments already effected. The total allotment for service expenditure fixed in the budget for the current year inclusive of the charges against Mining Revenue is Rs. 278·24 lakhs and as compared with the expenditure of Rs. 322·36 lakhs actually incurred in 1920-21, it represents a general reduction in service charges to the extent of Rs. 44·12 lakhs. It may also be pointed out that the retrenchment of Rs. 44·12 lakhs already effected includes a total sum of Rs. 10½ lakhs out of the reductions ordered on the recommendations of the Committee. Further reductions to the extent of 4½ lakhs have been ordered on their proposals since the budget was fixed and will be given effect to in the course of the year, bringing the level of service expenditure to Rs. 273¾ lakhs. Thus the total retrenchments already effected during the two years amount to Rs. 48·60 lakhs representing a reduction of 15% of the total service charges and 19% of the part of such charges open to reduction.

9. The minimum level, in the opinion of Government, to which the service expenditure of the State can be reduced with safety has already been indicated in the Dewan's Address presented to the Representative Assembly in June last. Inclusive of the charges against Mining Revenue, the minimum level of service expenditure has been fixed at Rs. 270 lakhs. Proposals for effecting a further reduction of about Rs. 3¾ lakhs are under the consideration of Government.

10. It may be pointed out that the reductions in service expenditure already effected and ordered involve the abolition of approximately the following number of posts in Government Service:—

Gazetted posts	74
Posts of Executive Subordinates ..	396
Ministerial ranks	178
Menials	977
	1,625

11. With reference to the recommendations of the Committee for the improvement of the resources of the State an additional grant of Rs. 50,000 has been placed in the budget of the current year at the disposal of the Conservator of Forests for the exploitation of the teak forests in the Heggaddevankote Taluk. License fees and fees for the occupation of travellers' bunglows have been enhanced and orders have been issued directing the levy of fees in suits filed before the Registrar of Co-operative Societies. The fees for the registration of documents have been enhanced by a notification to the standard in force in the Madras Presidency and bills for the amendment of the Mysore Stamp Regulation and the Mysore Court Fees Regulation providing for the enhancement of Stamp Duties and Court Fees as recommended by the Committee have already passed through the Legislative Council. The proposal to levy a super-tax is also before the same Council.

12. The Committee have prepared a forecast of revenue and expenditure for the next three years, 1923 to 1926, as requested in the terms of reference. They recommend that the normal revenue of Rs. 299 lakhs may be increased during this period to 323 lakhs of which Rs. 5 lakhs represent the enhancement under Stamp duties, Court Fees and Registration Fees and Rs. 19 lakhs the normal development under other heads of revenue. The policy of Government in this respect has already been indicated in para 39 of the Dewan's Address to the Representative Assembly. The improvement in three years anticipated in the general forecast is Rs. 56 lakhs.

13. The charges against the total revenue demand proposed by the Committee may be grouped as follows:—

(*a*) Normal Revenue Expenditure	250½ lakhs	
(*b*) Interest and Sinking Fund charges	50½	
(*c*) Reserves consisting of—		
Famine Fund Reserve	5	
Reserve for non-recurring expenditure	3	22
Irrigation Capital Reserve	3	
Mining Reserve	11	
Total ..	323 lakhs	

14. The policy proposed to be pursued by Government in regard to expenditure has also been fully indicated in detail in the Dewan's Address presented to the Representative Assembly in June last. This policy involves a clear classification, according to their nature, of the different resources of the State and the separation of Productive Works Finance from the Normal Administration Finances. The resources will in future be broadly classified under three heads comprised as follows:—

1. Normal Revenues.
2. Uncertain revenues and assets of a Capital nature.
3. Revenues from Productive Works.

It will be the endeavour of Government to meet all the charges on account of Service Expenditure, the Famine Insurance Fund, (Rs. 5 lakhs) and the Special Reserve for non-recurring expenditure, from the normal revenues of the State. In order that this object may be fully attained, it will be necessary to increase the normal revenues by Rs. 25 lakhs during the next three years and also reduce service expenditure exclusive of the charges against mining revenue to Rs. 268 lakhs from the standard of Rs. 275¾ lakhs fixed in the budget for the current year. The action taken with a view to reduce service expenditure to the normal level has been indicated above and the measures for the increase of revenue will receive the continuous attention of Government.

15. Government propose to utilise the Mining Revenue for building up another asset. The revenues from productive works stand at present at Rs. 45 lakhs, while the Interest on Loans and the Sinking Fund Contributions to be met from these revenues is Rs. 54 lakhs. Government propose to take measures to increase the revenues under productive works by Rs. 13 lakhs during the next three years. They are of opinion that the revenue from productive works should have to meet not only the interest on the loans raised by Government to finance them, but should also provide sufficient funds for industrial experiments and irrigational developments (Industrial Development Fund Rs. 1½ lakhs and Irrigation Capital 13½ lakhs). As the increase of 13 lakhs in the revenue from productive works will not be sufficient for paying the Sinking Fund of the Loans raised to finance them, Government are taking steps to take credit to the extent of about Rs. 11 lakhs annually from the Sterling Railway Loan Sinking Fund towards Sinking Fund Charges, Representations are being made to the Government of India to permit of this being done. The total improvement to be aimed at in the three years will thus be Rs. 56 lakhs per annum as follows :—

Increase in revenue (25 lakhs under normal sources and 13 lakhs under productive works.)	38 lakhs
Reduction of Expenditure	7 ,,
Contribution from Sterling Loan Sinking Fund ...	11 ,,
	56 lakhs.

16. The Committee have submitted detailed recommendations in respect of the total grant for Capital Works Expenditure during the current year. The total amount recommended by them for the various works now under progress is Rs. 55 lakhs. The budget for the current year fixes the Capital Works Grant at Rs. 46·54 lakhs. With reference to the Bhadravati Iron Works, the Committee consider that as another public loan would be necessary for completing the works, further progress may be stopped in order that the cash position may not be embarrassed. It has already been explained in the Address of the Dewan to the Representative Assembly in June last that it will not be necessary to float another loan to complete the works and that exclusive of the sum required for working capital, the amount required for completing the urgent items can be provided for in the Normal Capital programme. Government accordingly consider that it is not correct policy at this stage to close down the works as it is anticipated that operations will begin during the course of the month. Further information on the subject will be placed before the public at a very early date.

17. The Committee report that the Capital demand during the next three years will roughly amount to Rs. 150 lakhs. They recommend that it should be limited to Rs. 120 lakhs at an average rate of 40 lakhs per annum so that it might be possible to finance capital works without recourse to another public loan. This sum of Rs. 120 lakhs is proposed to be made up of Rs. 73 lakhs representing the normal accretions of the unfunded debt, *viz.*, Savings Bank Deposits, Life Insurance Fund, the Depreciation Funds and the Mining Fund Capitalisation Reserve and of Rs. 47 lakhs being the aggregate of the probable surplus revenues of the Civil and Military Station and the contribution from the Sterling Loan Sinking Fund during the next three years. Government are in full sympathy with the recommendations of the Committee that no public loan should be floated for carrying out the Capital Works Programme for the next three years. The requirements for the next three years under Capital Expenditure for Railways, Electric and Industrial Works are being carefully ascertained and Ways and Means for financing them will be laid down with due regard to this recommendation.

No. 4105-54—C. B. 163-22-1, DATED 13TH JANUARY 1923.

18. The main recommendations of the Committee in regard to the policy relating to public debt operations is the separation of the Sinking Fund and the Famine Reserve Fund from that maintained towards meeting the other liabilities of Government such as the Savings Bank Deposits, Insurance Fund, Local Funds, etc. Orders have already been issued to the Comptroller for the separation of the securities of the Sinking Fund and the Famine Reserve Fund from those maintained for the other liabilities. Both the Sinking and the Famine Reserve Funds will be invested in full in gilt-edged securities commanding the widest market and the Comptroller has been instructed to submit an annual review in his note on the Ways and Means Estimates in order to enable Government to watch the growth of these reserves.

19. In the concluding chapter of their report, the Committee make general recommendations suggesting the delegation of powers to Heads of Departments and the simplification of office work in the Revenue and other offices of the State. The Revenue Commissioner has already been invested with larger powers in order to reduce office work and correspondence and the simplification of work in all Public Offices is under the active consideration of Government.

(*a*) With reference to the recommendation of the Committee for the speedy disposal of darkhasts, Government have already passed orders placing an officer on special duty to assist the District officers for the early settlement of long pending applications for land.

(*b*) The Committee observe that the revenue under the Vani Vilas Sagara is insignificant as compared with the large outlay incurred on it and suggest measures for bringing under cultivation all lands served by the channels under the Reservoir. The matter has already engaged the attention of Government and orders are about to issue on the subject.

(*c*) In regard to their recommendation that a Committee may be appointed to work in conjunction with the Railway Administration for the better management of the Railways, the announcement made at the last Dasara Session of the Representative Assembly regarding the appointment of Advisory Committees will fully provide for the creation of the organization proposed.

(*d*) The recommendations of the Committee in regard to the surplus revenues of the Civil and Military Station and the relief necessary in the matter of the contributions paid by the people of the State to the Imperial Exchequer by way of customs duties are under the active consideration of Government.

(*e*) The question of the negotiability of our securities in British India urged by the Committee in their report has already been raised by Government and will be taken up again at a favourable opportunity.

(*f*) In regard to the recommendation of the Committee that the annual budget may be placed before both the Representative Assembly and the Legislative Council, Government have already announced the gracious decision of His Highness the Maharaja to permit the Legislative Council to vote on the budget and the Representative Assembly to move resolutions thereon.

20. In conclusion, Government take this opportunity of expressing their high sense of appreciation of the labours of Rajasabha Bhushana Diwan Bahadur K. P. Puttanna Chetty, C.I.E., Chairman, and the other non-official members of the Committee for their luminous survey of the financial position of the State and the great pains they have bestowed in passing under review the expenditure of every department of the State, in their endeavour to correlate sound finance with administrative efficiency. Their report has not only been helpful to Government in the matter of effecting economies in expenditure but has also served a larger purpose, *viz.*, the re-examination of the utility and efficiency of all Government activities from the standpoint of cost to the general tax-payer and also helped towards the formation of a correct public opinion on the true situation regarding the finances of the State.

K. MATTHAN,
Chief Secy. to Govt.

To—The other Secretaries to Government.
The Heads of Departments.
The Deputy Commissioners of Districts.
The Compiler, *Mysore Gazette*, for publication in the *Mysore Gazette*.
Copy to the Officer on Special Duty with the Dewan.

PRESS TABLE.
